

Press Release

Vinci construction is again with Sword CTSpace on the management of documents and work collaboration on their latest project: the new 'Yacht club de Monaco' conceived by the architects Norman Foster (England) and Alexandre Giraldi (Monaco). Sword CTSpace will implement their internet-hosted SaaS solution for the project.

Paris, France – December 14th, 2009– Sword CTSpace, developer of solutions for document management and collaboration in engineering and construction the world over, announced today that they will be working with Vinci Construction on the new 'Yacht club de Monaco'. The project has been designed by Lord Norman Foster (who has also developed the London City Hall, the Hearst Tower in New York and the Millennium Tower project in Japan) and Alexandre Giraldi (who is the main architect behind the Odeon Tower in Monaco).

The 'Yacht Club de Monaco' will tower above Louis II Boulevard at the end of the American quay on the Monaco harbor front. The designs have been described as a true architectural masterpiece. It is designed to be Monaco's sporting and social hub and when completed will form an infrastructure for the sailing school, the nautical society, event spaces, restaurants, bars shops and a museum. The main building will cover 59,000 ft² and there will be an additional 19,000 ft² of public space and terraces. The construction of the building is scheduled for completion by the end of 2011 and the total cost is estimated to be more than \$129 million.

Sword CTSpace will help Vinci to optimize communication on the project, simplify the access to documentation and put efficient approval and validation processes in place. The platform will make organization and control of the project fully transparent in a highly secure and evolving environment.

About Vinci Construction

As market leader in France and a major player in the world construction market, VINCI Construction brings together a comprehensive range of capabilities in building, civil engineering, hydraulic engineering and related services. With strong roots in its local markets in France and Europe through its networks of subsidiaries, VINCI Construction also plays a leading role in the world market for major engineering structures and specialized, technically sophisticated civil engineering, dredging and oil and gas infrastructure projects. VINCI Construction has a revenue of \$22,618 million and a workforce of 72,000 employees.

VINCI Construction is part of the VINCI Group of companies. Created in 1899, Vinci has become the largest company in construction and related services worldwide.

About Sword CTSpace

Sword CTSpace provides document management and collaboration workflow applications for the construction and engineering industry that increases the efficiency and reduces the risks in managing a built asset during its entire lifecycle. Sword CTSpace's solutions are used by market leading companies across industries such as Oil, Gas & Energy, Transportation, Utilities, Commercial Property and Government organisations. Multi-language solutions are available as SaaS (Software as a Service) or as extensions to leading ECM platforms such as IBM FileNet™ or Microsoft SharePoint™. Sword CTSpace's strategic solutions are helping more than 145,000 professionals on 13,000 projects in 56 countries benefit through improved business processes, enabling their companies to improve internal and external communications and demonstrate measurable business benefits. Asset owners and owners of critical engineering and construction programmes and projects realise faster turnaround, increased accountability, reduced risk and tangible cost savings. Sword CTSpace is part of the Sword Group of companies. For more information, please visit www.sword-ctspace.com
